***Claim Status***

Claims 1-3, 6-9, 12-14 and 17-20 are pending. Claims 4, 5, 10, 11, 15, 16, 21 and 22 have been cancelled. Claims 1-3, 6-9, 12-14 and 17-20 are rejected as detailed below.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 6-9, 12-14 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat No 6,643,641 (Snyder), hereafter Snyder in view of Pub No US 2002/0078043 (Pass et al), hereafter Pass.

Claims 1, 7, 12 and 18:

Snyder discloses:

parsing a set of pages for a plurality of text indexable elements [Snyder: web crawler 60, Fig 1, col 8, lines 35-40]

storing the plurality of text indexable elements in a computer readable medium as a plurality of records [Snyder: database 62, Fig 1]

Snyder discloses the elements of the claimed invention as noted above but does not disclose parsing a set of pages for a plurality of non-text indexable elements. Pass discloses parsing a set of pages for a plurality of non-text indexable elements [abstract]. It would have

been obvious to one of ordinary skill in the art at the time the invention was made to modify Snyder to include parsing a set of pages for a plurality of non-text indexable elements as taught by Pass for the purpose of retrieving images in in an efficient, useful and timely manner [Pass, paragraph 3]

The combination of Snyder and Pass discloses storing the plurality of text indexable elements in a computer readable medium as a plurality of records [Snyder, buffer memory 92, Fig 1, col 9, lines 55-60]

The combination of Snyder and Pass discloses receiving the search query to request a stored record, the search query received from a user across a networked connection [Pass, Fig 9, step 910, paragraph 79, paragraph 65]

The combination of Snyder and Pass discloses searching said plurality of records to determine text and non-text indexable elements that correspond to the search query [Pass, Fig 9, step 910, paragraph 79]

The combination of Snyder and Pass discloses transmitting at least one text element representation of said query result to a user across the networked connection [Pass, Fig 9, step 960, paragraph 65]

The combination of Snyder and Pass discloses transmitting at least one non-text element representation of said query result to said user across the networked connection [Pass, Fig 9, step 960]

Claims 2, 8, 13 and 19:

The combination of Snyder and Pass discloses wherein the object comprises an image [Pass; title]

Claims 3, 9, 14 and 20:

The combination of Snyder and Pass discloses wherein the record comprises a Web page  
[Pass; paragraph 65, col 9, lines 5-55]

Claims 6 and 17:

The combination of Snyder and Pass discloses wherein the object comprises a sound file  
[Pass; paragraph 66]

***Response to Arguments***

Applicant's arguments filed 4/9/2007 have been fully considered but are moot due to above new grounds of rejection which are required because applicant amended the claims.
